Anti Static Properties	<ul style="list-style-type: none"><li>Product is anti static. If application is life critical additional consultation with product expert is required. Electrical resistance can be significantly changed by flexing, contamination or moisture. Introduction of additional inner sole reduces static resistance</li></ul>
Lifespan	<ul style="list-style-type: none"><li>The application determines the length of service that should be achieved. Normal environments should provide 12 months' service, if appropriate care is taken. Refer Care guidelines</li></ul>

Uses

Suitability

Comments

General	Widely used	
Construction	Highly suitable	
Mining	Highly suitable	Care in very wet areas required. Gumboots would be more suitable for wet area applications
Petrochemical	Widely used	
Engineering	Highly suitable	
Power Generation	Highly suitable	
Agriculture	Not Required	
Food & Health	Not Required	
Fishing & Allied Industries	Not Required	
Fabrication	Widely used	
Metal Industries	Highly suitable	
Motor Industry	Widely used	
Glass Manufacturing & Fabrication	Widely used	Steel midsole advised to protect against glass penetration of the sole
Municipality	Not Required	
Waste Disposal	Not Required	
Civil Contracting	Widely used	
Moving and Rigging	Widely used	
Forestry	Not Required	
Telecommunications	Not Required	
Contract Labour	Widely used	
Transport - Air, Road & Rail	Not Required	
Transport - Shipping	Not Required	

It is important that the footwear selected must be suitable for the protection required by the wearer and the environment. If any uncertainty exists consultation between buyer and seller should be conducted to ensure that the correct footwear is selected. This application guide only offers very general advice and should be confirmed if there may be any concerns over potential protection from hazards of any form.
